Reference for Sasa Kovacevic

Sasa Kovacevic participated in Europas Kulturelle Forankring during his second-semester in 2011. The main purpose of this course is to enable students to analyse economic conditions, companies and their environments as a cultural phenomenon. The students acquire competencies to put these European phenomena into perspective by using a variety of unconventional frameworks of understanding.

To achieve these abilities Sasa Kovacevic has acquired the following qualifications:

a) Knowledge about:

- Cultural understanding and cultural concepts.
- Cultural perspectives on Europe in a globalized world.

b) Skills in:

- Implementing a consistent analysis based on theoretical approach to the problem area.
- Presenting a complex matter so it is understandable and relevant in answering.

I have come to know Sasa Kovacevic as a very open, friendly and active participant in lectures and classes with a genuine interest in the subject and an ability to relate theoretical issues to current social and political events in Europe. I therefore recommend Sasa Kovasevic warmly for the position as intern.

Yours sincerely,

Lotte Skovborg
